Services Provided: Architecture, Interior Design

Completion Date: In Progress

Perspective view of Project

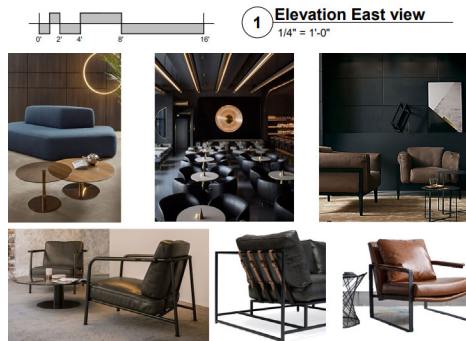

The Sammy Davis Jr theater in what was the Harrah's Casino and Hotel in Reno Nevada is to be converted into a performance center.

OS is renovating the decrepit historical room into a multipurpose performance room, while recreating the 1960s lounge music performance room vibe the building had in its heydays.

We lobbied with stakeholders to reclaim a space once glorious and important for the cultural significance of Reno that's been squandered by neglect and modernize it technically and designwise.
