

# New Doha International Airport

Doha, Qatar

Owner: State of Qatar Ministry of Municipal Affairs & Agriculture

Use: International Airport

The design of the Passenger Terminal facilities are an emblematic showcase of Qatar culture. The Terminal facility profile and supporting masts of the Ticketing Hall roof are clearly inspired by the traditional wooden Dhow. The cultural integration continues with richly detailed patterns used on floors, walls and exterior glass. Even the curving forms of the massive windswept sand dunes of Qatar's inland sea provide inspiration for the gentle curves of the Terminal Complex.

\*This project was designed when Aleksandr Sheykhet was with Fentress Bradburn Architects

*Each element was carefully designed, planned, and engineered in a great effort to express the essence of Qatar.*
